CRACK LEFT 40

Fibreglass cracks with soft grip pro.

FIXING:

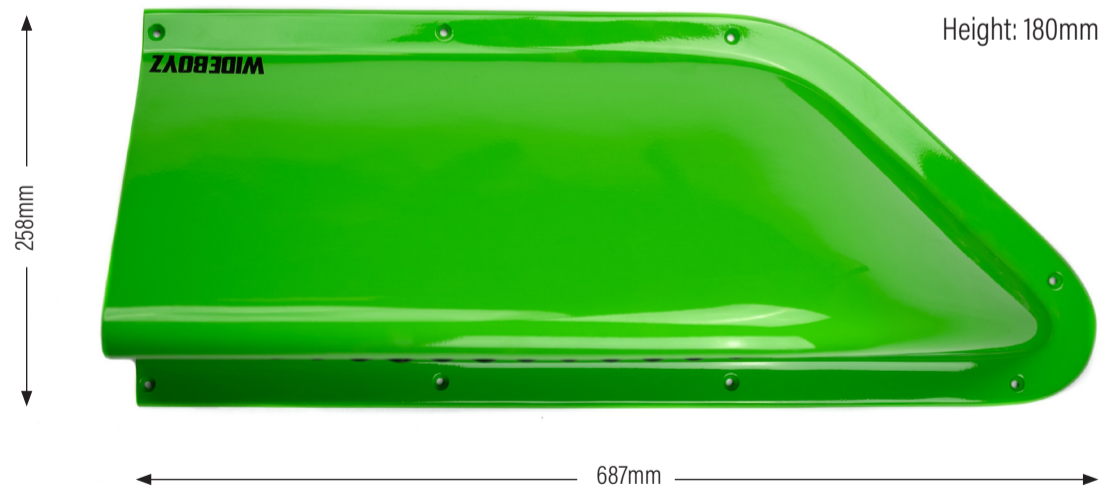

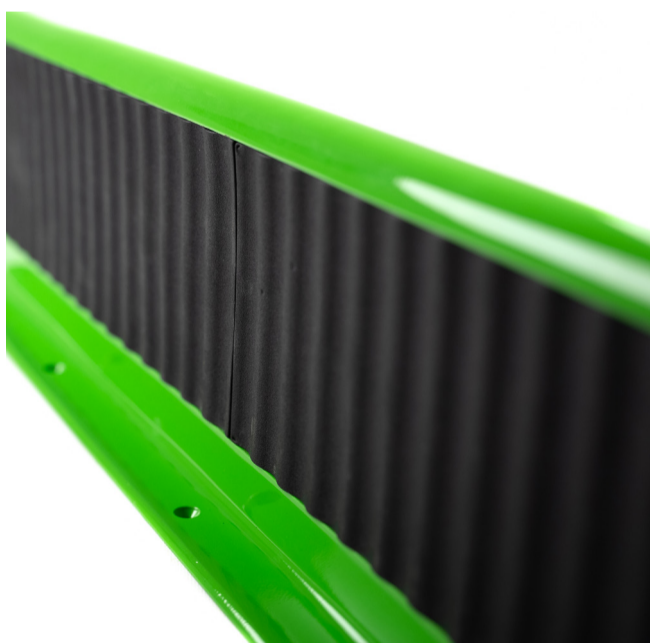

- + Units can be used singularly, stacked together, or used with side walls and other volumes to create cracks.
- + Wall screw fixing.

SHAPE:

- + Crack depth allows offwidth techniques to be used such as stacking and kneelocks.
- + Rounded crack edges for comfort on the feet.
- + Minimum width is tight hand jams, maximum width is unlimited.

MATERIALS:

- + Fibreglass body with Soft Grip Pro inner.
- + Dual textured to force jamming technique.
- + Dual density to provide structural rigidity but comfort when jamming.

SOFT GRIP PRO INNER:

- + Moulded shape fits the hand and knuckles ergonomically giving superior grip.
- + Soft density ensures no pressure wounds.
- + Fine textured surface provides added grip and prevents friction burns from slipping jams.
- + No taping required.

Patent Pending: UK Patent Application No. 2102416.1
